*Show + Summary*

Site involves a land/seawater interface. White is important color; rounded components are salient, suggesting a "dome-like" nature. ~~There's~~ There's a sense of something "swirling" at the site, of a seemingly nebulous consistency. Scales of site components seem rather large.

Something resembling a swirling/circular  
circular pattern of motion. Land is around it.

There is a manmade structure/structures associated  
with it. Motion is a very important element at  
the site. White is prevalent as a color, as is "roundness"  
as a dimension. AOLs of things like racetracks & sports  
stadiums are suggested.

Site conveys strong impression of ~~race track~~  
 or a similar activity involving intensive motion.  
 Circular movement is important, but there is other  
 activity that is not patterned or excitable - almost  
 random. Amusement Park is another strongly  
 suggested ADL. A high level of excitement  
 is present; people involved ~~as~~ seem to be present  
 for mirth, exhibition, enjoyment, thrill seeking,  
 etc.
